

FOR IMMEDIATE RELEASE

March 2005

## **NEWS RELEASE**

An-Cor Plastics is pleased to announce the appointment of BAU/HOPKINS as our Representative servicing the New England Market.

Many of you may already know BAU/HOPKINS and are aware of the technical expertise and reliable customer service. All of their personnel are now ready to assist you with your FRP Product requirements.

Within the fiberglass industry, An-Cor is considered the #1 quality fabricator and innovator of FRP and thermoplastic products and services. We design and build our products specifically to our customer's needs, Mr. An-Cor, the symbol of our company, has appeared as our logo since his creation in the mid-sixties. The An-Cor name was derived from "anti-corrosive" . . . the primary benefit of our product. The actual 6' tall Mr. An-Cor was built as a trade show model. His construction illustrates some of the primary materials and processes used in the manufacturing of FRP equipment. His legs are pipes, his body is a tank, his head is a good, and his arms are ductwork. Our company's slogan which was developed to communicate An-Cor's mission, is "Mr. An-Cor fights corrosion".

Should you have any questions or require additional information on any of our products or services BAU/HOPKINS can be reached at the following locations:
